

Position **Electrical / Automation Engineer (m/f)**

Reporting to Chief Technical Officer

Location / Travel Office in Luxembourg / Travel occasionally

The Electrical / Automation Engineer is in charge of the design of the control cabinets, the programming of their PLCs and the implementation of the remote accessibility of APATEQ products and installations.

The main responsibilities will be:

Drawing of the electrical plans following the P&ID,

Designing the control cabinets and supervising their execution,

Programming the systems' PLCs in accordance to the P&ID and the logic diagram of the installation,

Developing and programming the installations' VPN for remote accessibility,

Collaborating with the Process and the Software Engineers in house and on the field to offer the best customer experience.

The ideal candidate should meet the following requirements:

Academic background University degree in either Electronics, Electrotechnics, Automation or any IT discipline.

Professional experience 5 to 10 years of experience in PLC programming and control cabinets design, ideally for automated installations, water treatment or industrial systems with complex measurement and control equipment and remote access.

IT skills Expert knowledge in Step 7, Logoblock, E-plan and VPNs.

Language skills Fluent in English; German or French would be an asset.

Soft skills Autonomous and self-starter with a strong sense of planning and organization,
Business centric approach to R&D and keen for innovation,
Hands-on attitude, conceptual and out-of-the box thinking,
Good team player, problem solver and attention to detail,
Well structured and organized, proactive and resourceful,
Well spoken, good listener with strong communication skills.
