

APATEQ SA engineers and manufactures turn-key, custom designed oil-water separation systems for oilfield operators, compact wastewater treatment plants for demanding applications and pre-treatment systems for industrial wastewaters.

With the most advanced wastewater treatment and water conservation solutions currently available on the globe, APATEQ's stellar experts are anxious to cost effectively solve its clients' decentralized wastewater treatment requirements.

APATEQ SA has now an opening for a

PRODUCT MANAGER

Under the supervision of the Manager/Chief Technology Officer, you will be in charge of bringing the project from a process phase to a finished product.

Your main responsibilities / Your role:

- Defining the overall vision for the product, setting goals, and outlining the product strategy;
- Deciding on the product architecture, the location of components within the product and the supply chain configuration;
- Supervising the design and its implementation on all modules of the final product;
- Creating and maintaining the product plan, prioritizing features, and managing the product backlog;
- Supervising the overall mechanical installation of the product by translating the P&ID into a practical, user-friendly installation;
- Managing the product purchasing process and the subcontractors' deliverables execution;
- Managing projects from concept to completion, including planning, scheduling, budgeting, and resource allocation;
- Working closely with engineering, design, and other teams to develop and launch new products or features.

Your profile

The ideal candidate should meet the following requirements:

- University degree in Wastewater treatment, Hydraulics, Electro technics, Electronics or Mechanical construction;
- At least 5 to 10 years of experience ideally in wastewater installations, mechanical constructions, or automation systems;
- Proven experience in overseeing all elements of the product development lifecycle;
- Ability to develop a product vision and strategy;
- High effectiveness in managing cross-functional teams;
- Good knowledge in Inventor and MS Project would be an asset;
- Fluent in English; German or French would be an asset;

- Entrepreneurial spirit, autonomous self-starter with a strong sense of planning and organization;
- Business centric approach to R&D and keen for innovation;
- Hands-on attitude, conceptual and out-of-the box thinking;
- Good team player, problem solver and attention to detail;
- Well-structured and organized, proactive and resourceful;
- Ability to effectively communicate technical information to both technical and non-technical audiences;
- Well spoken, good listener with strong communication skills.

Please be aware that for this position, you may be required to travel occasionally.

For any questions you may have, feel free to contact Mrs. Isabelle CLOOSEN, HR Manager on careers@apateq.com.

If you are passionate about sustainability, innovation, if the future of the wastewater treatment challenges you, we would happy to hear from you. Do not hesitate and send your application letter with detailed curriculum vitae, on a pdf format careers@apateq.com.

We are always looking for talented people to join our team and help us create a cleaner, greener world.
